Professional Summary

Aspiring Software Engineer with a builder's mindset, experienced in designing and developing end-to-end software projects using modern engineering practices. Passionate about writing clean, efficient code and grounded in strong fundamentals in **Python, MySQL, ML, OOPS, Computer Networks, Web Technologies** and **Django**.

Experience

Infosys Springboard, Machine Learning Intern11/2025 – 12/2025

- Worked on Machine Learning projects involving **data preprocessing, model training,** and **evaluation** using Python
- Implemented **supervised learning** and regression models using **Scikit-learn**
- Applied **Pandas** and **NumPy** for data cleaning and transformation
- Gained exposure to deploying ML models in real-world environments

Education

B.Tech in Computer Science & Engineering (AI & ML), Raghu Institute of Technology2022 – 2026
CGPA: 8.53

Intermediate (XII), Rajadhani Junior College2020 – 2022
Percentage - 92%

SSC (10th), S.V.N High School2019 – 2020
Percentage - 97%

Projects

Ransomware Detection Using Machine Learning

- Developed a Machine Learning-based **ransomware detection** system to classify malicious and benign software using **HPC** behavioral features
- Trained and evaluated **Random Forest, Decision Tree,** and **SVM** models, achieving high detection performance using Accuracy, Precision, Recall, and F1-Score
- Built an efficient malware classification pipeline using **Scikit-learn**, enabling early detection of ransomware attacks and reducing false positives

Smart Stock - Inventory Optimization For Retail Stores (Machine Learning)

- Built a regression-based **sales forecasting** model using **Gradient Boosting Regressor**
- Predicted product-wise demand to improve inventory planning
- Used Python, **Pandas, NumPy, Scikit-learn,** and **Matplotlib** for model building and analysis
- Improved **demand prediction** accuracy compared to baseline regression models

Student Management System (Python)

- Engineered a Python-based application to **manage student records**
- Implemented **CRUD** operations for storing, updating, and retrieving student details

Skills

Programming Languages Python, Java	Web Technologies & Frameworks HTML, CSS, JavaScript, Django and Flask	Databases MySQL
Soft Skills Teamwork, Communication, Problem Solving, Leadership	Machine Learning & Data Supervised Learning, Regression	Developer Tools VS Code, Jupyter Notebook, GitHub, LeetCode, CodeChef

Certifications

• Python Foundation – Infosys Springboard

• Programming in Java – NPTEL

• SQL – Geeks For Geeks
